

Protecting our natural environment is a core value and a necessary element of good corporate citizenship within Prosegur.

Specifically, this policy commits to:

- Proactively identify and comply with all applicable legislative, contractual and business requirements.
- Where possible eliminate all adverse environmental aspects and impacts from our activities, products and services.
- Integrate environmental sustainability considerations into product and service designs, and in dealing with suppliers and contractors.
- Maintain a management system in order to reduce risks and continually improve the effectiveness of our environmental processes.
- Provide resources necessary to lead, support, monitor and maintain accountability for policy implementation.
- Promoting this environmental policy by communicating openly with authorities, customers and other stakeholders.
- Require every employee and contractor to adhere to these standards.

We believe the protection of the environment is everyone's responsibility. In all of the above, we consult, seek and expect the involvement and contribution of our employees and contractors as we strive for continuous improvement.
