

**“Partnering with Prosegur for our cash management solution was the best decision we made”**

Stuart Jamieson, Club Rivers, CEO

# Cash and Security Solutions

Partnership with Club Rivers, NSW

# Background

---

“Club Rivers is a medium-sized club and we operate seven days a week,” explains the club CEO, Stuart Jamieson. “We are always looking at ways to be smarter, more efficient and more productive.”

Despite being content with his cash-management provider, Stuart conducted a review of his most progressive competitors. In doing so, he discovered the difference our integrated end-to-end cash-management solutions could make – and got in touch to see how we could help.

## Our approach

---

Stuart and his Gaming Manager, Paul Millar, were invited to visit another club serviced by Prosegur and given full access to the real-time cash solution from start to finish. Impressed by the efficient and transparent process, it was time to talk business.

Working in partnership with Stuart and the operational-management team, Prosegur tailored a cash-management solution that met the everyday needs of Club Rivers – while increasing its long-term sustainability in ways not previously considered.

## The solution

---

- 🌐 Safe reconciliation and balancing
- 🌐 Preparing of daily floats and tills
- 🌐 Daily banking of gaming revenue
- 🌐 ATMs
- 🌐 Cash Redemption Terminals (CRT)
- 🌐 Clearance of gaming machines

**“The clubs money is now working for us in real time, reducing the amount of cash held on premises and lowering insurance premiums”**

“Before partnering with Prosegur, we would have to wait a week for our provider to pick up our money, verify the amount and transfer it to our account,” Stuart explains. Now we get daily same-day banking, which means our money is always working for us.”

The club has since seen improvements in corporate governance and values the ability to explore the many new initiatives that can improve overall business productivity.

“Now that the club’s money is working in real time, it reduces the amount of cash we hold on premises – lowering our insurance premiums,” Stuart adds. “That’s just a small example of the many flow-on benefits we’ve experienced with Prosegur’s custom-built, cash-management solutions. It’s just so much more efficient.”
